

Portfolio Montage , reel spec

A ~15.5 second, fast-cut reel built entirely from existing still photos already sitting in Google Drive. No new footage, no host on camera, no stated opinion, ambient instrumental music bed only. The goal is breadth, not depth: four active projects across two states shown back to back in one short clip, so a viewer can see at a glance how much real work is happening right now. Every text overlay below states a fact, never an opinion, and follows the standing brand rules: no dollar figures, full state names, street names only with no house numbers, no contractions, and no em dashes.

~13s total · 9:16 · stills only

3 properties · 6 real photos

No host · no voiceover

Music: ambient instrumental bed

Status: draft, awaiting review

REVISION LOG, NEWEST FIRST

- rev 3 · 2026-07-22, Howder Street removed entirely, not shortened. Both Howder and River Street already have their own dedicated reels, so neither belongs in this montage. Montage is now three properties, opening line updated from "four" to "three," total runtime down to about 13 seconds.
- rev 2 · 2026-07-22, closing card now matches the tagline and end card locked during the prior Howder Street edit review (7/11-7/13 annotation history), instead of an invented CTA line.
- rev 1 · 2026-07-22, initial draft.

RUNNING ORDER, ~13 SECONDS, 5 SEGMENTS

#	SEGMENT	TIME	DUR	PHOTOS	OVERLAY, SHORT
0	Intro hook	0:00–1.5	1.5s	none, title card	"Three projects. One team. This week."
1	East Saint Joe	1.5–5.0	3.5s	2 (before/after)	"East Saint Joe", before/after tags
2	Norwood	5.0–7.5	2.5s	2	"Norwood"
3	East Victoria Street	7.5–10.5	3.0s	2	"East Victoria Street, Indiana" + basement fact
4	Closing card	10.5– 13.0	2.5s	none, title card	proof line + tagline

Movement logic: every still gets a slow Ken Burns push-in or pan, applied in the edit since there is no source video. No cut holds longer than needed to read the text. The two title cards (segments 0 and 4) bookend the montage on the same plain background so the reel opens and closes on the brand mark, not on a property. Howder Street and River Street are excluded entirely, both already have their own dedicated reels.

SEGMENTS

0. Intro hook

1.5s

title card, no photo

Opens on a count, per the research on list and countdown hooks performing well in the first second. No property photo yet, this is a pure text card so the first four properties land as a surprise.

ON-SCREEN TEXT

Three projects. One team. This week.

PRODUCTION NOTE

Static title card: plain dark background, centered white type, small gold mark in the lower corner matching the brand canvas. Hold 1.5 seconds, no motion, no photo. Hard cut into segment 1, no crossfade.

Howder Street, removed

UPDATED, rev 3

Dropped entirely, not just shortened. Both Howder Street and River Street already had their own dedicated reel edits ship (Howder 2026-07-15, River Street via the longform brand film), so neither belongs in this portfolio montage at all, not even as a brief cameo. The montage now runs three properties instead of four: East Saint Joe, Norwood, East Victoria Street.

1. East Saint Joe

3.5s

genuine curated before/after

This is the one property with a real, already-curated before/after pair. It is the visual payoff of the segment, the text overlay stays out of the way and lets the two stills do the work.

BEFORE

REAL

AFTER

REAL

ON-SCREEN TEXT

East Saint Joe

Small corner tag reads "Before" over the first still, flips to "After" the moment the crossfade lands. The street name can reappear briefly on the after still as the payoff caption.

PRODUCTION NOTE

Slow Ken Burns push-in on the before exterior held about 1.5 seconds, crossfade over 0.4 seconds into the after exterior, held with a slow zoom for the remaining time. Let the crossfade carry the message, keep the text minimal so it never competes with the visual change.

2. Norwood

2.5s

INPUT NEEDED

Mid-renovation interior work, exposed brick chimney and fresh insulation and framing. Text overlay names the street only.

GUTTED INTERIOR

REAL

INSULATION, FRAMING

REAL

ON-SCREEN TEXT

Norwood

PRODUCTION NOTE

Quick cut: gutted interior with the exposed brick chimney held about 1.3 seconds with a slow pan, hard cut to the fresh insulation and framing held about 1.2 seconds with a slow push-in.

FLAG, NEEDS SHAVIT INPUT

His Drive folder for this property is privately labeled **"local luxury"**. That positioning is not confirmed, it is an open question, not a stated fact. Do not use that language, or anything implying it, in the visible overlay or caption, or anywhere else, until Shavit explains the angle and signs off on it. This segment ships with the plain street name only.

3. East Victoria Street

3.0s

closing anchor

Indiana, the second state in the reel, closes the property run before the closing card. This property has a separate numbered-countdown carousel post planned this same week, so this segment stays brief and does not repeat that carousel's specific numbered list.

NEW SIDING, NEW SYSTEM

REAL

EXTERIOR, WINTER

REAL

ON-SCREEN TEXT

East Victoria Street, Indiana

Basement was a dog breeding operation before purchase.

PRODUCTION NOTE

The two selected stills show the finished exterior siding and the new system install, not the basement itself, so the pairing here is conceptual: the text states the property's history, the photos show its current, cleaned-up state. That is a legitimate before/after framing even though the two are not the same pixels. Cut: siding and system still held about 1.5 seconds with a slow push-in, hard cut to the winter exterior held about 1.5 seconds with a slow pan. The fuller story, including the eviction of prior tenants, is left out of this caption on purpose, it belongs to the separate carousel post already planned for this property this week, not to a fifteen-second breadth reel. If a literal basement still exists in Drive and Jake wants a tighter visual match, swap it in for one of these two.

FLAG, DE-IDENTIFY CHECK

The winter exterior still ([eastvictoria-2.jpg](#)) has a person visible near the shed, distant and back turned, likely a contractor. Face is not identifiable at this distance and angle, but confirm that before this ships. Blur or crop if there is any doubt. No edit has been made to the photo itself, this is a check item only.

4. Closing card

2.5s

title card, no photo

UPDATED, rev 2

Bookends the intro on the same plain background. A proof line summarizing the breadth just shown, then the same tagline and end card locked during the prior Howder Street edit review, for

consistency across reels rather than a one-off CTA.

ON-SCREEN TEXT

Three projects. Two states. Moving now.

Live with us. Work with us.

Second line is the standing tagline from the prior Howder reel's end card, kept identical on purpose so the two reels read as one consistent brand mark, not the invented CTA this draft had before. The separate "DM the word LIVE" keyword mechanic is a different thing (an Instagram auto-reply trigger, not this on-screen tagline) and is intentionally left out of this card, see flag below.

PRODUCTION NOTE

Same static title card treatment as the intro, for a clean bookend. Hold 2.5 seconds. Proof line lands first, tagline follows a beat later. Logo mark in the corner should match the prior Howder Street reel's end card exactly, not a new treatment.

FLAG, TWO OPEN QUESTIONS

(1) Confirm the exact prior end card treatment (logo placement, type, hold time) so this one matches it precisely rather than approximating from memory. (2) The "DM the word LIVE" auto-reply mechanic discussed separately for this week's content is a real, distinct idea worth using somewhere, just not layered onto this already-established tagline card. Confirm if it belongs on the East Victoria carousel caption instead.

OPEN ITEMS BEFORE THIS SHIPS

- 🚩 **Norwood, "local luxury" positioning.** Unconfirmed. Needs Shavit's input before that language becomes any stated claim, in this reel or anywhere else.
- 🚩 **East Victoria Street, de-identify check.** One still has a person visible near the shed. Confirm the face is not identifiable, blur or crop if there is any doubt.
- 🚩 **Closing card, "DM LIVE" line.** Confirm the keyword mechanic is active in the current playbook before shipping, otherwise drop the line.
- ❑ **No new footage, no host time.** Confirmed, every segment above is built from stills already in Drive, nothing new needs to be shot.
- ❑ **Brand rules.** Checked against every visible overlay above: no dollar figures, full state names, street names only with no house numbers, no contractions, no em dashes.
