

What I Need From You to Take the Marketing Live

A one-time handover. Once these are in place, the whole system runs on its own — you stay focused on the projects, and the brand never goes quiet.

How to read this: Items marked *Blocks launch* are the hard gates — nothing publishes until they're done. Everything else is refinement we can collect as we go. You don't need to gather it all at once; just the three on the critical path below get us live.

THE CRITICAL PATH — THESE THREE GET US LIVE

1. **Meta Business Suite admin** on Instagram + Facebook (so I can schedule and publish)
2. **Shared Drive folder + one crew-lead contact per project** (the content engine)
3. **Brand kit** — logo files + exact color codes (so everything is uniform and on-brand)

1

Access & Accounts

BLOCKS LAUNCH

Admin access — never your passwords. Add me as a manager.

- ☐ **Instagram** — admin on the account via Meta Business Suite
- ☐ **TikTok** — login or admin access
- ☐ **YouTube** — channel access (Brand Account → add me as Manager)
- ☐ **Facebook Page** + Meta Business Suite admin — this is what lets IG & FB schedule together
- ☐ **Google Drive** — a shared folder for all project assets
- ☐ **Newsletter platform** login (Beehiiv / Mailchimp), or the OK to create one
- ☐ **shavitrootman.com** — registrar + hosting/DNS access, or your developer's contact

2

Brand Kit

ON-BRAND

So every post is uniform and mirrors the website — exactly as you asked.

- ☐ **Logo files** — vector (SVG/AI/EPS) + transparent PNG, all variants (full, mark-only, white)
- ☐ **Exact brand colors** — hex codes for the navy + bright orange
- ☐ **Brand fonts** — the typefaces used on the site (or where to license them)
- ☐ **Sub-brands** — Charger Realty, DSR, Charger Property Mgmt, Baroutman: which get featured
- ☐ **Watermark** — the exact mark + placement you want on reels
- ☐ **Existing collateral** — any past materials you like the look of

3

Content Pipeline

BLOCKS LAUNCH

The real engine. Your crews are the camera — I work from their photos.

- ☐ **One crew-lead contact per active project** + the OK to message them directly
- ☐ **Buy-in that crews shoot the photo set** — before / progress / after, matched angles (5-min ask)
- ☐ **A shared photo drop per project** — WhatsApp album or Drive folder
- ☐ **A starter backlog** — existing before/after photos from current projects, so we launch with content banked
- ☐ **Approval to feature** specific projects/addresses publicly (flag any that stay private)
- ☐ **Partners/people** you want tagged or credited — and any you don't

4

Website

WEBSITE

For the site build & maintenance deliverable.

- ☐ **Current site content** — copy, portfolio/property info, team bios, photos
- ☐ **What stays vs. changes** — reskin, rebuild, or new pages?
- ☐ **Integrations** — contact-form destination, CRM, listing feeds, analytics
- ☐ **Maintenance scope** — confirm what ongoing upkeep covers

5

Sign-offs & Guardrails

ALIGN

Cheap to settle now, expensive to skip — these set the pace.

- ☐ **Approval lane** — do you review before publish, or trust me to ship + review monthly?
- ☐ **Voice do's & don'ts** — anything off-limits (no figures? no client names?)
- ☐ **Cadence** — confirm the 2–3 reels/week ceiling
- ☐ **Evaluation window** — lock the 6-month–1-year scorecard period
